

Dear Customer:

Thank you for contacting us regarding the B17 Flying Fortress simulation you purchased.

To properly install version 2 of the game, the update disk needs to be the same size as the original disks. Because we have been holding a list of names for some time, there may be some of you that need to switch the size of the update disk. If this is the case, please contact Customer Support at (410)771-1151.

The enclosed disk contains the latest software revision. Please install it onto your hard drive using the following procedure:

- 1) Have your original game disks ready.
- 2) Place the disk into the appropriate drive.
- 3) Change over to that drive (A: or B:).
- 4) Type the command INSTALL.
- 5) Follow the on-screen prompts. The revision will install the revision and the original game over the existing files.

Following installation, please read the READ.ME file, found in your B17 subdirectory; it has useful information regarding the revision. To read it, move to the B17 subdirectory, and type TYPE READ.ME; use CTRL/S or the PAUSE key to control scrolling.

Again, thank you for contacting us, and we hope the enclosed revision enhances your enjoyment of B17 Flying Fortress. If we may be of any assistance in the future please feel free to contact us.

Sincerely,

Guy LaMarr
